## LITERATURE

### The Bright Young Things: English Novelists Between WWI and WWII

We will look at this period in history through the eyes of notable writers of this era. Our focus will be on understanding the historical framework of the writing of this era, and the writers themselves. In preparation for our discussions, students may want to do some reading on their own and then share their learning and observations with the class. Some suggestions for independent reading are any of the short stories or novels by Somerset Maugham (whose novel *The Painted Veil* has been made into a Golden Globe Winner film), P.G. Wodehouse, Anthony Powell, Evelyn Waugh, E.M. Forster and Aldous Huxley, or any of your favorite English authors of this era. You may also want to explore biographical works about these writers.

## POLITICAL SCIENCE

### Preachers, Parishioners, Politics, and Public Policy: The Role of Religious Beliefs and Organizations in the Public Square.

This course will address the following questions: Should a person's religious beliefs influence his/her views on candidates for public office and on public policy? Should a religious organization, e.g., local church or national denomination, try to influence the making of laws or the election of officials? If so, should it do it directly, e.g., lobbying, or indirectly, e.g., influencing the views of its members? Should the federal government deny tax-exempt status to a religious organization if it engages in "politicking"? These questions will be addressed from the standpoint of constitutional law, political philosophy, and theology. Class-members will be invited to share their opinions and respond to challenging questions.

**Dates:** Monday, Wednesday and Friday, July 9, 11 and 13

## RELIGION

### God in the Brain: Conversations Between Religion and the Cognitive Sciences

This course will explore the relationship between the sacred and the brain. Participants will have the opportunity to consider proposals on the neurobiological mechanisms of mystical experiences, as well as proposals on why and how the mind is inclined to religious beliefs. Religious interpretations, especially within the Christian tradition (but not exclusively), will also be studied. The goal is to familiarize participants with a concrete example of the ongoing dialogue between religion and science. The format for the class will be a combination of proposed pre-assigned readings, lectures, and group dialogues.

**Dates:** Tuesday, Wednesday and Friday, June 26, 27 and 29

**Time:** 10 a.m. – noon

**CRN:** 80790

**Fee:** \$60 for Silver members; no fee for Gold or Gold Plus One members

**Faculty:** Carmelo Santos-Rolón is a Ph.D. student in Religion and Science at the Zygon Center for Religion and Science and the Lutheran School of Theology at Chicago. He is currently writing a dissertation with the title: "Symptoms of God? A Dialogue Between Cognitive Science and Theological Pneumatology," which is a constructive proposal on how a religious symbol, namely the Spirit, can be illuminated when viewed in light of recent findings on the neurobiology of religious experiences, and likewise, how those scientific findings can be further interpreted when viewed from the perspective of the religious symbol of Spirit. He is interested in ways in which science and religion can enrich and challenge each other in an open and constructive dialogue, and in ways that religion and science can work together in the search for more wholesome ways for humans to interact with nature and with each other.

## The Lands of the Ancients

Our journey begins in the Four Corners area of Arizona, New Mexico, Colorado and Utah. We will explore the roots of native American culture, the Anasazi - now called the Ancients, from 750-1050 A.D. Chaco Canyon is generally thought to be the origin of this civilization. This site, where ruins still remain, was abandoned and the Ancients moved to Mesa Verde, to Canyon de Chelly, the Natural Bridges and Walnut Canyon for reasons still unexplained. Seeing the amazing ruins of this sophisticated civilization will open our minds to new ways of thinking about this early culture in the United States.
